**BEN BEALE -**

Ben currently serves as the Extension Educator for Agricultural Sciences in St. Mary's County Maryland. In this position, he has the responsibility to develop and implement programs in crop and vegetable production, farm management and marketing. Beale attended the Institution of Applied Agricultural majoring in Farm Management/Ag. Business followed by completing a BS degree in Agricultural Sciences at the University of Maryland. He also holds a Master degree in Management and Marketing from the University of Maryland. He is also still involved in the family farming operation in which he was raised. Ben will discuss High Tunnel Production of main seasonal crops, cultural methods and problems as well as common pest problems.

Matt has spent his career at Conard-Pyle developing their "grow-soft" program. Matt has pulled together programs to incorporate beneficials with timed soft chemicals treatments to reduce the nurseries impact on the local environment. He has trialed many methods and sees it can be done for most pests in a large nursery and also save money!

Come learn from Matt and his hands-on experience to see what you can do in your nursery or greenhouse operation.

**MATT SHULTZ -**

**MARGARET McGRATH -**

Meg is an Associate Professor with a research/extension appointment in the Department of Plant Pathology and Plant-Microbe Biology at Cornell University. She is stationed at the Long Island Horticultural Research and Extension Center in Riverhead, NY, where she has been working since 1988 after obtaining her PhD at the Pennsylvania State University. Meg works on optimizing management of diseases affecting vegetable crops within organic as well as conventional production systems and also on determining impact of ambient ozone on plant productivity. Fungicide resistance and other aspects of managing powdery mildew of Halloween pumpkin and other cucurbit crops have been the focus of Meg's program. She also works on Phytophthora blight and foliar diseases in tomato.

Recertification Credit session for pesticide applicators for the surrounding states will also be available for those who attend.
